RV TOTE TRAILER

RV TOTE TRAILERS ARE SMALL, LIGHTWEIGHT, COMPACT, AND EASY TO USE.

RV TOTE TRAILERS are small portable D.O.T. approved trailers that allow you to easily dump and refill your RV without the hassle, time and expense of taking down, moving/driving your RV to a dump site, refilling and moving back to set up once again. RV TOTE TRAILERS are equipped with RVIA certified large dump tank (80 gal), fresh water tank (68 gal), macerator pump, and fresh water transfer pump to accomplish quick and easy dumping and refilling of your RV. Weighing approx 295 lbs empty and approx 1090 lbs in service, small cars, vans, golf carts, and even ATVs can tow them. For RVs that are set on site for extended periods of time you don't have to use your tow vehicle or drive your motor home, saving time and fuel.

10' x 1" hose from Macerator pump with shut off valve, threads into top of Black water tank making the transfer easy and convenient with no spillage.

Hose carrier with 10' dump hose attached to dump valve.

Flow-Jet macerator pump, 1" hose and 20' fused wire harness with switch to attach to a 12v battery. The macerator pump quickly extracts and grinds up the waste from your black and gray tanks and pumps it into the holding tank on the RV TOTE TRAILER.
